

Fragment

```
classDiagram
    class Fragment
    class DataExchangeFragment["com.example.android.wearable.wcldemo.pages.DataExchangeFragment"]
    DataExchangeFragment --|> Fragment
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Fragment'. Below it is a larger, shaded box containing the package and class name 'com.example.android.wearable.wcldemo.pages.DataExchangeFragment'. A blue arrow points from the shaded box up to the 'Fragment' box, indicating that DataExchangeFragment inherits from Fragment.

com.example.android.wearable.wcldemo.pages.
DataExchangeFragment
